About Me

→ I graduated as a practical software engineer from Shenkar College of Engineering, Design, and Art in 2024. In the recent decade, I have engaged in diverse roles and responsibilities in the technology sector relating to technical support and problem-solving for clients.

→ I bring a proven history of adaptability, team collaboration, and proficiency in addressing technological challenges.

Projects

FINAL PROJECT - SMOKEYE | HTML5, CSS, ReactJS, React Native, MongoDB, Node.js
2023 | Shenkar

→ "SmokEye" - Our app helps fight smoking violations in public spaces. This application is a product of a collaboration with Dr. Yael Bar-Ze'ev from the Israeli Ministry of Health. Using self-reported information from its user base, this application is intended to help researchers develop a systematic and up-to-date information base with geographic segmentation of smoking violations in public. In turn, this should assist enforcement agencies in the city and benefit the entire community.

AUTHENTICATION WEBSITE | HTML5, CSS, ReactJS, MongoDB, Node.js, Firebase
2023 | Personal

→ A Responsive authentication website harnesses various technologies used in web development. The project offers secure login using Google and Facebook for a seamless user experience.

Experience

TECHNICAL SUPPORTER | Bank Hapoalim
2019 – Present | Ness

→ I support business clients in the investment house of Bank Hapoalim. I work with different systems, such as CA Service Desk, Network Access Control (NAC), XML, Citrix, and banking trading systems. In this position, I provide a high level of service to the bank's priority customers. This work necessitates rapid independent learning and teamwork.

Military Service

TECHNICAL SUPPORT DEPARTMENT MANAGER | Intelligence Corp
2016 - 2017 | IDF

→ I served as a technical supporter of various systems and applications of the Israeli intelligence corps. My team of soldiers and I were tasked with resolving different issues and problems. I received a certificate of distinction for my service.

Skills

PROGRAMMING

Experienced:
- C#
- HTML5
- CSS
- Javascript
- Node.js

Familiarity:
- Python
- MongoDB
- SQL
- JSON

LIBRARIES/FRAMEWORKS

- Express.js
- ReactJS
- React Native

TOOLS/PLATFORMS

- GitHub
- Figma
- Photoshop
- Firebase

Education

SHENKAR HANDESAIM

Practical Software Engineer
2021 - 2024
Theoretical and practical knowledge in numerous software engineering and computer science disciplines. Including OOP, data structures, algorithms and UX/UI design.
