EXPERIENCE

TECHNICAL SUPPORTER | BANK HAPOALIM
Jun 2019 – Present | Ness

- ➔ support business clients and investment houses of Bank Hapoalim.
- ➔
- ➔ my role is to supporting business clients and investment houses of Bank Hapoalim. And I worked with different systems such as: AS400 systems, CA Service Desk, Network Access Control (NAC), XML Files, Citrix and against banking trading systems.
  This position required providing a very high level of service to the bank's business and preferred customers and in addition required rapid independent learning and teamwork.

TECHNICAL SUPPORTER | MINISTRY OF EDUCATION
2017 – 2018 | Matrix

- ➔ Supporting teachers and managers in different systems.
  As a part of my role is to work in VDI environment.

PROJECTS

FINAL PROJECT - SMOKEYE | HTML, CSS, JAVASCRIPT (REACT, REACT NATIVE), MONGODB,NODE.JS
2023

- ➔ "SmokEye" - This application was born in collaboration with Dr. Yael Bar-Zev from the Israeli Ministry of Health. this app is intended to provide an actual research tool for the benefit of the residents, but in order to develop a systematic and up-to-date information base with geographic segmentation for the benefit of research work and in addition to the work of the enforcement agencies in the city.

AUTHENTICATION WEBSITE | HTML, CSS,JAVASCRIPT (REACT), MONGODB, NODE.JS
2023

- ➔ authentication website harnessing MongoDB, Node.js, React.js, JavaScript, CSS, and HTML. The project prioritizes robust user security with secure password storage and seamlessly integrates Google and Facebook for a frictionless login experience. The email/password authentication is implemented independently of Firebase, delivering a secure, responsive, and feature-rich authentication solution.

PROFILE PAGE | HTML, CSS, JAVASCRIPT (REACTJS)
2024

- ➔ responsive profile page using vite.js
